

eQuilibrium® Standing Technology introduces a revolutionary shift in postural behaviour for the individual who is on their feet for work, recreation or rehabilitation.

eQuilibrium® takes standing to a new level for **stability, comfort and strength**. eQuilibrium changes the way our muscles and balance system works to help relax and strengthen our joints as we stand and move about.

eQuilibrium® helps reduce muscular stress while improving vascular activity and enhancing overall productivity.

Clinical Trial conclusions comparing eQ Almond to flat Floor Standing:

“There was a positive effect of reduced low back pain during standing for pain developers when the eQ Almond was compared to standing on a level surface... The eQ Almond creates a favourable postural variability in both pelvic and lumbar spine angles...The eQ Almond appears to introduce changes in standing style that result in beneficial reductions in low back pain during prolonged standing exposures...The positive outcomes were supported in the satisfaction rating of the participants, with 87.5% indicating that they would use the eQ Almond if they were in an occupational setting that required prolonged standing work”

# eQuilibrium®, eQ, Suite of Products

eQuilibrium®, eQ, represents a family of energy platforms for standing; uniquely designed to provide

**natural solutions for relief of back pain**

**and standing fatigue**

as well as neck, shoulder, hip knee and foot issues.

“My name is Jose Sanchez; I am 56 years old and work for PowerComm Inc. for several years...

I suffer from hereditary varicose veins. When I am standing for too long in the same position my feet and legs start to swell and get very tired.

For the last couple of years I have used, in my workstation, a special platform made out of fiberglass which has given me positive results. The pain in my legs and feet are gone and at the end of my shift I do not feel tired as I used to. Also my spinal column does not feel the effects of standing for 8 hours as before”.

All eQ products are manufactured for a lifetime of use.

Our industrial eQ platforms are made from reinforced fiberglass to withstand heavy loads and a variety of environments.

Our Commercial/ Consumer platforms are manufactured using Vacuum Formed Wood Laminate Technology.

## Price List: eQ Standing Technology

eQ1 Industrial Model designed for standing comfort, reduced fatigue and improved individual productivity in the workplace. 36" diameter reinforced fiberglass.	\$369.00
